

Product Ingredients

Chamomile

Sodium Lauryl Ether Sulphate	From lauryl alcohol (coconut sourced). This derivative produces an efficient detergent with degreasing, emulsifying and foaming properties.
Sodium Cocoamphodipropionate	Derived from coconut oil to produce a gentle, amphoteric surfactant, foaming agent with anti-irritant properties
Sodium Alpha Olefin Sulphonate	Derived from palm oil. Delivers a readily biodegradable and efficient surfactant/emulsifier.
Cocoamidopropyl betaine	Based on coconut fatty alcohols, this is a mild, high foaming surfactant with excellent cleansing properties.
Coco Dimethyl Amine Oxide	Based on coconut fatty alcohols, this is a mild, high foaming surfactant with superior cleansing and thickening properties.
Coconut Diethanolomide	A coconut based, non-ionic ingredient that is a mild foam stabiliser and thickener, with good cleansing properties.
Lauryl Alcohol Ethoxylate	Lauryl alcohol is produced from coconut or palm oil. A very gentle surfactant cleaner and grease emulsifier.
Herbal, Lime and Chamomile Fragrance	An exclusive blend developed for it's fragrance and protective properties to ameliorate the drying potential of product surfactants.
Extract of Chamomile	Used for it's anti-inflammatory, anti-irritant and anti- bacterial properties.
Extract of Marchmallow	Used for it's anti-inflammatory, anti-irritant and anti- bacterial properties.
Sodium Hydroxymethyl Glycinate	Gentle preservative derived from glycine, or aminoacetic acid - a naturally occurring amino acid. Commonly sourced from sugar or soy.
EDTA	Ethylenediaminetetraacetic acid - disodium salt. Prepared from acetic acid (obtained from distillation of wood), this is an extraordinarily effective antioxidant and stabiliser. Efficient as a preservative and essential in small quantities to maintain colour and consistency qualities.
