

## Product Ingredients

### Little One Baby Bath

Purified water	
Lauryl polyglucose	Processed from lauryl alcohol (coconut) and glucose (from corn). Very environmentally and user friendly foaming detergent and stabiliser.
Cocoamidopropyl betaine	Based on coconut fatty alcohols, this is a mild, high foaming surfactant with excellent cleansing properties.
Oleo-imidopropylbetaine	
Cocoamphodipropionate	Based on coconut fatty alcohols, this is an exceptionally mild, high foaming surfactant with efficient cleansing properties.
Cocoamidopropyl Hydroxysultaine	Based on coconut fatty alcohols, this is an exceptionally mild, high foaming surfactant with cleansing properties.
Methyl Gluceth 20	Produced from glucose (corn) and methyl alcohol (from hydrogen and carbon dioxide). A versatile, gentle, effective humectant, emollient and foaming agent.
Glyceryl Cocoate	From glycerine and coconut oil, as a refatting agent, emollient and emulsifier.
Sorbitan Laurate	From glucose and coconut oil. A foamer, wetting agent, surfactant and emulsifier.
Citric Acid	Organic acid, abundant in nature, or commercially refined from sugar. Used as a gentle cleaner for acid sensitive contaminations, or to neutralise alkalinity.
Fragrance	All fragrances are exclusive blends based on natural floral and herbal extracts. Some blending with perfume compounds is necessary in some products for balance and stability.
Tetra Sodium EDTA	From ethylenediaminetetraacetic acid (tetrasodium salt). Prepared from acetic acid, this is an antioxidant, stabiliser, chelating agent, preservative and disinfectant activator.
Ammonium Laureth Sulphate	Lauryl alcohol is extracted from palm and coconut oil. Gentle, foaming cleanser that is an efficient but mild active for shampoos, bath and facial products.
Sodium Hydroxymethylglycinate	Gentle preservative derived from glycine, or aminoacetic acid - a naturally occurring amino acid. Commonly sourced from sugar or soy.
