

## Product Ingredients

### Maxim

Acetic Acid	Organic acid, abundant in nature. Obtained from distillation of wood. Solvent for organic contaminations, acids sensitive soils & mineral salts. Example: vinegar (very dilute form).
Citric Acid	Organic acid, abundant in nature, or commercially refined from sugar. Used as a gentle cleaner for acid sensitive contaminations, or to neutralise alkalinity.
Disodium Capryloamphodipropionate	Caprylic alcohol or octanol is extracted from coconut oil esters. This derivation produces a very gentle, low-foaming surfactant.
