

## Product Ingredients

### Pristine Fabric Finish

Cornstarch	A natural starch, extracted from cornmeal. It is a bodying ingredient, activated by iron heat.
Malto-dextrins	Derived from wheat and grains, they are useful as an ingredient binder or starch modifier.
Silicon Emulsions	From silica, processed to deliver a slip/glide agent.
Silicon Resin	From silica, processed to deliver an agent that imparts body and condition to fabric.
Perfume	
Sodium Hydroxymethylglycinate	Gentle preservative derived from glycine, or aminoacetic acid - a naturally occurring amino acid. Commonly sourced from sugar or soy.
