

Product Ingredients

Silk Ambrosia

Purified water	
Apricot Kernel Oil	Cold pressed from Apricot seeds. This ingredient is high in essential fatty acids, with excellent absorption qualities. It is ideal for dry, chapped skin.
Avocado Oil	Cold pressed from Avocado flesh, this ingredient is rich in amino acids, proteins, vitamins and minerals. It is an impressive moisturiser and is easily absorbed by the surface of the skin.
Shea Butter	Exotic, very rich source of essential fatty acid complexes and Vitamin F. Derived from the nuts of Central African Mangifolia tree. A rich nutrient, it creates silky smoothness to the skin.
Coco-caprylate/capratae	
Glyceryl Cocoate	From glycerine and coconut oil, as a refatting agent, emollient and emulsifier.
Octyl Stearate	A gentle emulsifier, based on esters of stearic acid, from palm oil. An excellent emollient & skin conditioner.
Methyl Glucose Sesquistearate	Produced from glucose (corn), methyl alcohol and palm oil. A gentle, effective emollient and emulsifying agent.
Methyl Gluceth 20	Produced from glucose (corn) and methyl alcohol (from hydrogen and carbon dioxide). A versatile, gentle, effective humectant, emollient and foaming agent.
Calendula Oil	Extracted from the common Marigold, this oil is used for it's healing properties. It also increases blood flow to the area to which it is applied. It is also used in our products to increase the suppleness of the skin.
Gluconic Acid	Natural fruit acid, derived from corn. High in Alpha Hydroxy acid, this lends exfoliant and cell stimulant qualities.
Malic Acid	Naturally occurring in apples and many other fruits and plants. Used for it's AHA, exfoliating, cell-stimulating properties.

Hydrolised Wheat Protein	Water soluble whole wheat protein. Moisturising protein, skin & hair conditioner with film-forming potential.
Cocoa Extract	
Panthenol	From Vitamin B5. Used to create humectant properties in skin and hair conditioners. Also highly regarded for it's anti-inflammatory properties.
Tocopheryl Acetate	Natural Vitamin E, from wheat germ or soy bean. Anti-inflammatory, emollient, moisturiser and anti-oxidant properties.
Allantoin	An active of Comfrey root. Used for anti-inflammatory, soothing and healing properties.
Lavender Oil	Sourced from Tasmanian Lavender, this essential oil is renowned for it's calming, restful and healing properties. Exceptionally effective in our jene Night Complex Cream.
Ylang Ylang Oil	Distilled from the freshly picked flowers of the Canaga odorata plant. Basis of a high quality scent, imparting a warm and sensual fragrance.
Menthyl Lactate	
Cetyl alcohol	Fatty alcohol extracted from coconut or palm oil. Useful as a skin conditioner, thickening agent or emulsifier.
Phenoxyethanol	A preservative obtained by treating phenol. Gentle enough for topical disinfection.
Sodium hydroxymethyl glycinate	Gentle preservative derived from glycine, or aminoacetic acid - a naturally occurring amino acid. Commonly sourced from sugar or soy.
