

Product Ingredients

Tropique

Lauryl Alcohol Ethoxylate	Lauryl alcohol is produced from coconut or palm oil. A very gentle surfactant cleaner and grease emulsifier.
Lauryl-Myristyl Quaternary Ammonium Chloride Mixture	From lauryl myristyl alcohol, from coconut or palm oil. Produces a powerful bactericide.
Extract of Vanilla	Acts as a deodoriser and re-odouriser. Excellent as a subtle, natural fragrance for our tropical disinfectant. Produced from alcoholic extract of <i>Vanilla planifolia</i> .
Fragrance	All fragrances are exclusive blends based on natural floral and herbal extracts. Some blending with perfume compounds is necessary in some products for balance and stability.
Food grade colouring	Added where the naturally developed product would be visually unappealing and for safety and identification purposes. Only those colours considered safe for all FD&C applications are used.
EDTA	Ethylenediaminetetraacetic acid - disodium salt. Prepared from acetic acid (obtained from distillation of wood), this is an extraordinarily effective antioxidant and stabiliser. Efficient as a preservative and essential in small quantities to maintain colour and consistency qualities.
