

## Product Ingredients

### Integrity Vitality Conditioner

Dimethyl stearamine	
Di-palmitoylethyl hydroxyethylmonium methosulphate	
Di-cocoethyl hydroxyethylmonium methosulphate	
Lactomidopropyl trimonium chloride	A cationic conditioning agent, based on milk. An excellent moisturiser and humectant, with anti-static properties.
Cetearyl Alcohol	A 70:30 blend of cetyl and stearyl alcohols, used as an emulsifier, thickener and gentle emollient.
Coco glucoside and glycerol stearate	
Lauryldimonium hydroxypropyl hydrolised wheat protein	
Hydrolysed almond protein	
Keratin amino acids	
Polyquaternium 39	
Extract of Chrysanthemum	
Extract of Lime Blossom	
Extract of Cranberry	
D-Panthenol	A vitamin B5 precursor, highly regarded for it's moisturising and anti-inflammatory properties.
Citric Acid	Organic acid, abundant in nature, or commercially refined from sugar. Used as a gentle cleaner for acid sensitive contaminations, or to neutralise alkilinity.
Fragrance	All fragrances are exclusive blends based on natural floral and herbal extracts. Some blending with perfume compounds is necessary in some products for balance and stability.
Grapefruit seed extract
